

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

The user needs to recognize the handwritten digit because it is useful to solve complex problems and make human job easier so that would be useful for recognition of different handwriting very effectively and quickly.

Key rules of brainstorming To run an smooth and productive session

Stay in top

Encourage wild ide

Defer judgment

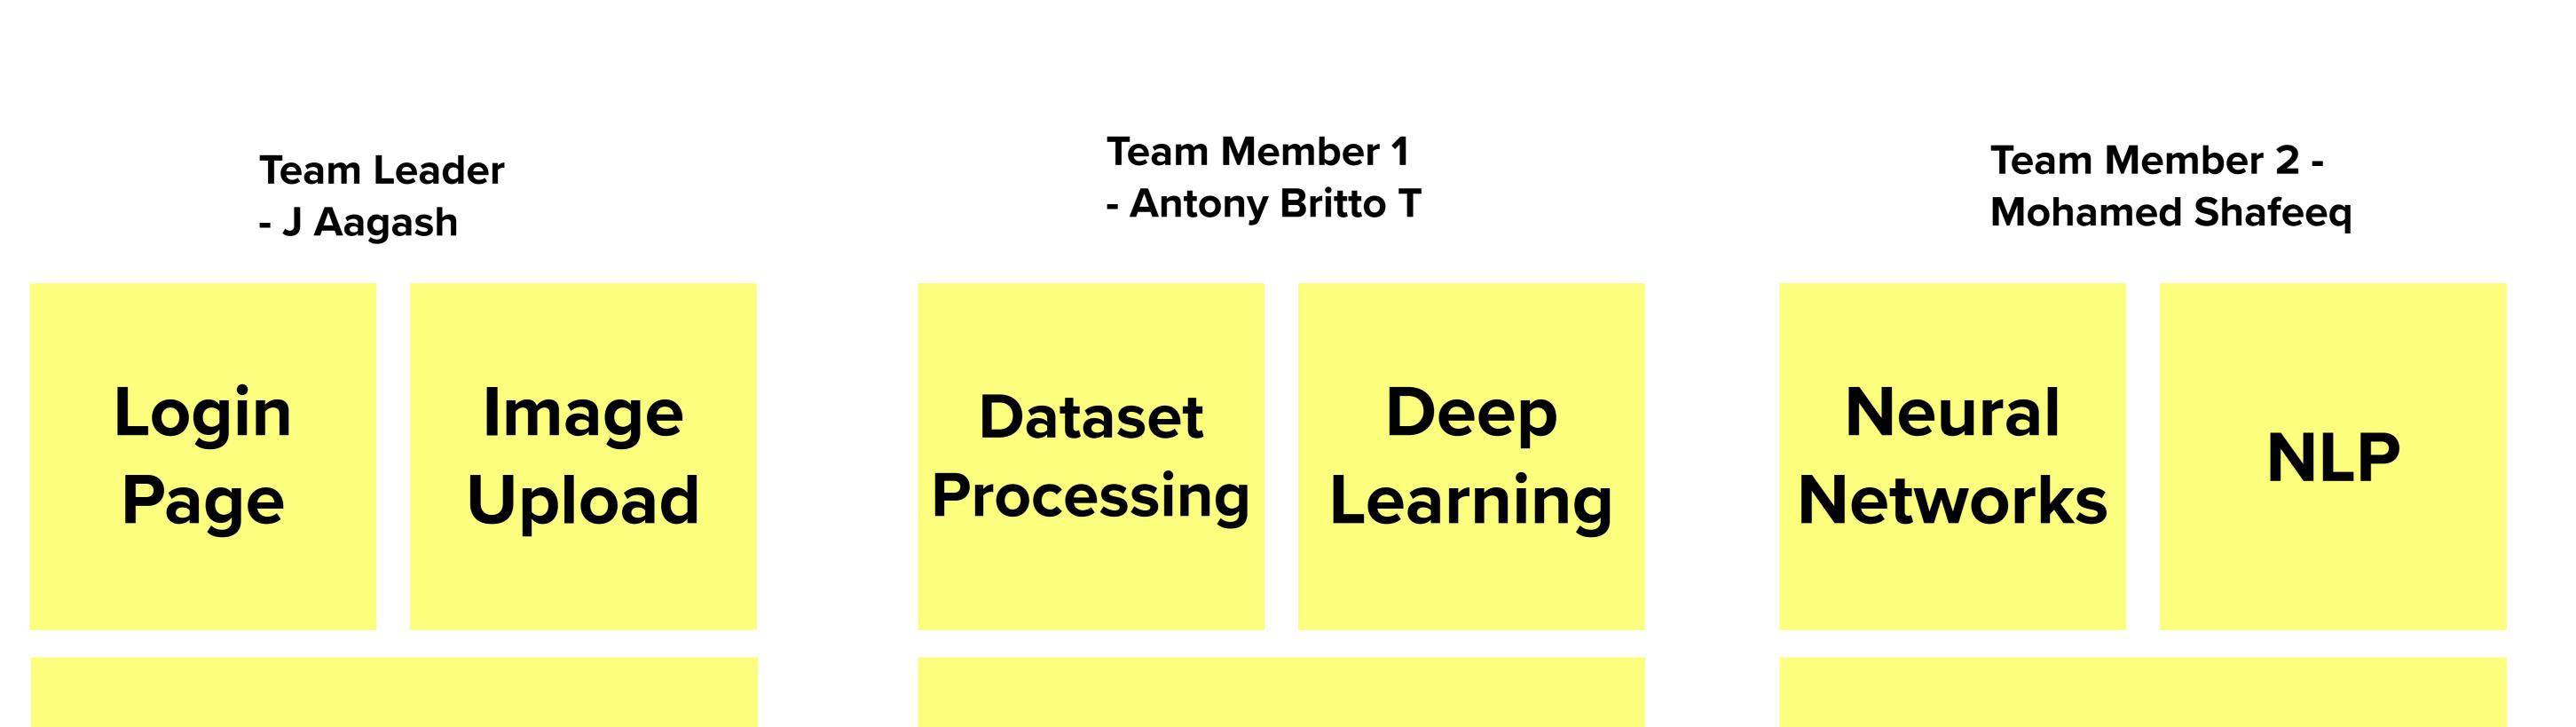

Liste

Brainstorm

Write down any ideas that come to mind that address your problem statement.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
